

Dear Patient,

2020 has been a very challenging year for everyone! We have no doubt that we will be stronger than ever together when this pandemic is over, and beyond. At Columbia Asthma and Allergy Clinic, we take great pride in everything we do for our patients. All of our staff are extremely dedicated and conscientious! At CAAC, our patients always come first! We want you to know that we care very much for our patients.

We continue to offer all of our traditional asthma and allergy services. Since 2017, we have been offering ultrasound guided lymph node injections as a very efficient treatment for environmental allergens such that only 3 injections are needed. We have had great success with this new procedure with 90% of patients experiencing either resolution of their symptoms or a dramatic reduction in their symptoms. We are the first clinic in the country to offer this service.

We want you to know that we are here for you to provide the absolute best care for all your asthma, allergy, and immunology needs. We have been very honored to serve you and hope very much that we can continue to serve you for years to come!

We wish you and your family a very happy and healthy new year!

Warmest wishes,

Sanjeev Jain, MD, PhD
